JOSE JR. VILLALON OCTA

IT SUPPORT SPECIALIST | WEB DEVELOPER | GRAPHIC DESIGNER

PROFESSIONAL SUMMARY

Results-driven and detail-oriented **BS Information Technology** graduate specializing in **Graphic Design** from ACLC College of Daet. Recognized for Outstanding Performance during On-the-Job Training, awarded as a **Dean's Lister**, and **TESDA NC II Certified** in Computer Systems Servicing. Skilled in web development, technical support, database management, hardware and network troubleshooting, graphic design, video editing, and business process automation. Demonstrates strong problem-solving abilities and the capability to develop innovative digital solutions that improve operational efficiency, productivity, and user experience.

PROFESSIONAL EXPERIENCE

IT & Administrative Intern

2024 – 2025 · 486 hrs

ACLC College of Daet — Registrar & Academic Head Offices

- Assisted in managing and organizing confidential student and institutional records with accuracy and efficiency.
- Performed document scanning, digitization, and database organization to improve record accessibility and workflow management.
- Provided technical support for office computers, printers, and network-related concerns.
- Conducted hardware maintenance and troubleshooting to ensure uninterrupted office operations.
- Supported administrative tasks including data encoding, file management, and technical coordination.
- Recognized with a Certificate of Recognition for Outstanding Performance during the 26th College Commencement Exercises.

Retail Operations & IT Support Assistant

2018 – Present

Family-Owned Business

- Implemented a digital inventory tracking workflow and maintained accurate product, sales, and supplier records.
- Provided IT support for POS devices, printers, and small business networks to reduce downtime.
- Created and managed digital filing systems for receipts, invoices, and business documents.
- Automated store processes through simple web tools and digital solutions to improve operational efficiency.

TECHNICAL SKILLS

- PC Assembly & Hardware Troubleshooting
- LAN Setup & Network Administration
- Web Application Development
- Graphic Design (Photoshop, Canva, Photopea)
- Digital Filing & Record Management
- Microsoft Office Suite
- Website Deployment via GitHub & Netlify
- Frontend Web Development (HTML, CSS, JavaScript)
- Git & Version Control (GitHub)
- Document Digitization & Data Management
- Technical Support & IT Assistance
- Information Security & Data Management
- Video Editing (Premiere Pro, CapCut)
- Responsive Web Design & UI Enhancement

TECHNICAL PROJECTS

Online Enrollment, Payment & Grading System

Capstone 1 & 2 · 2024–2025

Developed a web-based Enrollment, Payment, and Grading System designed to streamline student registration, payment processing, grade management, and academic record handling for ACLC College of Daet. The system provides secure account access for school administrators and personnel, including the School Director, School Head, Accounting Office, Registrar, and Professors, allowing efficient management of student records, grading, enrollment transactions, and academic data. Contributed to frontend development, database integration, system functionality, and user interface optimization to improve operational efficiency, accuracy, and overall user experience.

Personal Developer Portfolio

myportpoliocta.netlify.app

Designed and developed a responsive personal portfolio website showcasing technical projects, certifications, academic achievements, and creative works. Built using HTML, CSS, and JavaScript with modern UI/UX design principles and deployed through GitHub and Netlify.

Auto Receipt OCTA System

Personal Project · 2026

Built a custom Progressive Web App (PWA) for a family-owned coconut and copra trading business to streamline daily operations, automate sack-weight calculations, manage debt and cash transactions, generate Bluetooth thermal receipts (ESC/POS), and maintain transaction records with backup/restore functionality.
